## Pressure Injury CEU

Alginates come in sheet or rope forms. Perineal skin cleansers are more effective for prevention and treatment of IAD than traditional soap and water.

## Parkinson's disease

Pulsatile lavage equipment includes intermittent high-pressure lavage along with suction to loosen and remove necrotic tissue from the wound WOCN, 2016a. The Bates-Jensen Wound Assessment Tool BWAT is comprised of 15 items, of which 13 are scored from 1 to 5.

## Stereotactic Radiosurgery

Frank and his wife continue to have difficulty with his care at home, nursing home placement will need to be considered.

## The Diagnostic Process

During observation, your doctor will likely recommend periodic CT or MRI scans at an appropriate interval to monitor the tumor.

## Pressure Injury CEU

High-dose vecuronium, the priming technique, or timing principles for atracurium or vecuronium are all effective and approach the rapid onset of action times of succinylcholine. Remember that in the majority of cases there is a reason why the patient is not compliant with care.
