The Largest Mirrored Building on Earth, the Maraya Concert Hall in Saudi Arabia

Additionally, there is no way to eliminate the release of large amounts of carbon dioxide that occur simply as a by-product of the production of cement, steel, and plastic. All the architecture that we know of is architecture of the Holocene.

At Ciudad Abierta, Chilean artists used architecture to find utopia

For example, Daniel Williford argues that concrete combined with new types of finance to shape housing and urban crisis in colonial and postcolonial Morocco. Without fossil fuels, heavy machinery must be powered with either electricity or some combustible substance such as biodiesel.

Bad Earth

Chongqing has followed the default growth paradigm of isolated multi - tower - in - the - park developments located at the periphery of the city that are, by default, conceived in isolation; this paradigm fails to envision the concurrent architectural production within the city as a possible force that can be focused and utilized to shape the urban experience, reduce overall transportation time, reduce energy consumption and make evident the reality of the scale at which the city is growing.

Redesigning The Most Remote Village On Earth

Each structure interacts with an element of the natural environment.
