Specifically, the technology can be incorporated into the Mycogen® and Dairyland Seed® brands in the U.

**Syngenta**

Remarkable job and great efforts by your research team

**Syngenta**

Bio-pesticides are eco-friendly and effective alternatives to chemical pesticides.

**Agricultural Production**

This disruption in the supply chain was mainly due to the lockdowns that were declared in many countries to contain the spread of coronavirus. Crop protection is the science and practice of managing plant diseases, weeds and other pests both vertebrate and invertebrate that damage agricultural crops and forestry. The manufacturers are focusing on expanding their geographical presence as well as increasing their production

capabilities.

### **Global Crop Protection Chemicals Market Trends & Forecast 2019**

Additionally, the rising global population has led to an increased focus on demand for food security and high demand for crops, thereby contributing to the growth of the cereals segment. These two volumes by the same author now present a world-wide coverage of the economically important insect pests of tropical and temperate agriculture.
