The 2020 20 Twenties: Tomorrow's Technology Leaders

Harold founded the ICRTD series of in 2002, he co-chairs the conferences with the local host organisation.

Tomorrow's Forecaster Taking Shape

Learn how to get your shot at Vaccinate. A new generation of feedstock uses waste with much greater CO₂ reduction — about 70% even on a full life-cycle basis — but faces land use, distribution, scale-up and ultimately scarcity challenges.

Koukis Aviation

As other industries reduce their carbon emissions aviation will account for ever-larger shares of IATA argues that taxation siphons money out of aviation that could be used for innovation, however that tax is paid by the airlines not the manufacturers of airframes and engines, the people who will innovate.

Koukis Aviation

Beckman has volunteered with the Space Public Outreach Team and Letters to a Prescientist Program to improve youth STEM outreach. In this series, we explore trends and innovations that will help shape the future of the aviation industry, with each episode diving into a specific topic that is fundamental to the progress of aviation. Mihaylov was chosen for the Brooke Owens Fellowship—through which she interned at The Aerospace Corp.
