

Precambrian ophiolites of Arabia - a summary of geologic settings U-Pb geochronology, lead isotope characteristics, and implications for microplate accretion, Kingdom of Saudi Arabia

Dept. of the Interior, U.S. Geological Survey - TÜRKİYE JEOLOJİ BÜLTENİ

Description: -

Science/Mathematics

Quantum groups

Matrices

Lie algebras

Mathematics

Advanced

Nonfiction

Quantum physics (quantum mechanics)

Fields & rings

Combinatorics & graph theory

Applied mathematics

Picture books

Geology, Stratigraphic -- Precambrian

Ophiolites -- Saudi Arabia
Precambrian ophiolites of Arabia - a summary of geologic settings U-Pb geochronology, lead isotope characteristics, and implications for microplate accretion, Kingdom of Saudi Arabia

U.S. Geological Survey open-file report -- 88-606

Open-file report -- 88-606
Precambrian ophiolites of Arabia - a summary of geologic settings U-Pb geochronology, lead isotope characteristics, and implications for microplate accretion, Kingdom of Saudi Arabia

Notes: Include bibliographical references (p. 66-81)

This edition was published in 1988

However, in line with the materials used in cuneiform inscriptions and monumental architectural structures such as temples, etc, the supply of building materials was also provided by distant sources. The Arabian Shield is geologically complex, and despite more than 70 years of modern geologic investigation, profound questions about its genesis and tectonic setting remain.
