The Trauma Of Childhood Sexual Abuse

Professionals should not only provide crisis counseling to the child, but also help the non-offending caregiver attend sensitively to their child in a way that is helpful to her or his recovery. This responsibility lies with all of us and we need to give all parents and adults working with children the knowledge to recognize the signs of abuse and the tools to report it to the proper authorities when they see it or suspect it.

Effects of Child Sexual Abuse on Children

Together, these reactions make the events very difficult and confusing for children.
