Extending the Scope of Corpus-based Research. It is also limited to the fields of English language teaching, English language and literature, applied linguistics and modern languages, in which the dissertations were produced; hence, further studies might involve analysing broader corpora, comprising dissertations or research papers submitted or published in other disciplines.

Contrastive linguistics

Applying a statistical model may include using a stochastic channel model algorithm that, for example, performs minimal operations on a small tree to create a larger tree. In decoding a new string, first it is parsed into a large syntactic tree t for example, using the parser described in M.

Translator makes linguistic choices that are subjected by the pragmatic action of discourse, for instance: when tackling politeness, the translator must take into account any differences that can exist socioculturally in translating concepts like 'requesting' or ordering Yule, 1996. That means that the paratactic CDM couple was found five times as frequently as the hypotactic CDMs in question. His results revealed that the two translations mostly maintain lexical, semantic and grammatical equivalence but fail to fully convey the metonymic functions found in the Quranic Arabic.

These statements would undoubtedly remain intelligible even when the italicised components were not used to connect them. The context is the only criterion for selecting appropriate words. The French may or may not have been translated from English originally, but by removing the noise,

one can hypothesize an English source—and thereby translate the string.
