Both articles were well written and revealed their author as a man with an excellent knowledge of the naval air service. The latter group included several doctors who became interested in the construction of aircraft. In 1928 he published an interesting and factual paper Standardization of the Instrument Panel of Training Aircraft in which he first pointed out the need for correct positioning of the controls of the aircraft.

Практическая аэродинамика самолета АН

For more detailed description of methods based on the use of ρJ_x from Table 4. Such containers with an incendiary mixture are intended to destroy wooden structures, oil tank farms, ammunition dumps, railroad depots with rolling stock, personnel, materiel, and other targets by fire.

9 May

Trajectory of the Pursuit Curve Method.

Influence of atmospheric turbulence on bomb release

At the same time it was only the psychophysiological trend in practice the psychotechnical trend in outlying psychophysiological laboratories that was actively supported by the Central Laboratory and the Military Medical Board mainly by Zalkind , but these laboratories did not have any scientific output.
