Process for Preparation of Vitamin C and Method for Determination of Vitamin C in Tablets

Prerequisites: CHEM 6B or 6BH. The theoretical basis for nucleic acid and protein structure, as well as methods of structure determination including X-ray crystallography, cryoEM, and computational modeling approaches will be covered. May be coscheduled with CHEM 155.

Michaelis

Preparation of Vitamin C Sample Solution From the strip of Vitamin C random two tablets were weighed and smashed to form powder and average value was calculated. Table 5 lists the results obtained by the proposed method with triiodide method. May be coscheduled with CHEM 213B.

Process for Preparation of Vitamin C and Method for Determination of Vitamin C in Tablets

This advanced course covers the application of machine learning and modeling techniques to biological systems.

Michaelis

Prepares students to make meaningful observations of how K—12 teachers deal with difficulties. Dehydroascorbic acid is most stable at pH 5. Prerequisites: CHEM 40B, 140B, 40BH, or 140BH and BIBC 100 or BILD 1 or CHEM 114A.
