Regional biodiversity networking mapping

How can we support you? The Caribbean Natural Resources Institute CANARI is facilitating the development of the CBS for the CARICOM Secretariat. Where pest animal numbers are reduced by using traps or poison, bird numbers soon recover, and the health of our forests improves. For some time now, the Basque Government, along with the rest of the public administrations, have been involved in a long and sustained effort to actively protect and manage the Basque Natural Heritage, with the work carried out in the Natura 2000 Network areas and the management of the conservation of threatened species of flora and fauna being outstanding in recent years.

Southern African Development Community :: Show

Nature underpins our identity and wellbeing, from calling ourselves kiwis to the silver fern on our sport shirts, and our pride in the pristine and spectacular land and seascapes we call home. Keeping Nature in our Future, the Strategy is an environmental policy framework that sets priorities for identifying, preserving and restoring important natural areas. Canterbury Biodiversity Strategy Canterbury boasts a diverse range of habitats and ecosystems that support a remarkable array of plant and animal life.

Biodiversity strategy for 2030

Information contained has been assembled in good faith. We also support individuals and groups to keep the momentum of their biodiversity work going. The Bristol Biodiversity Partnership The Bristol Biodiversity Partnership was formed in September 2005 with the setting up of the partnership steering group.

CARICOM targets year

Most major rivers flow into sheltered harbours and they are generally slow flowing and muddy. It was developed collaboratively by a large number of independent people, businesses, agencies and councils. Threatened species Due to many new pest species being introduced such as possums and wild ginger , the native animals and plants that make our region so special are becoming rarer.
