A History of Silver

We offer a vast selection of blue sapphires, pink sapphires, yellow sapphires, white sapphires and other unique natural sapphires. It is unknown if anyone uses such silvers in colloidal silver production - indeed it is the rare individual who even knows of its existence! In particular, a few researchers have noted that the moon significantly influences colloidal silver production. It is the largest precious metal statue ever found.

History of Silver

Silver coins were made, which were called Joachimsthalers.

The Silver Series: The History of Silver (Part 1)

Catalysis Silver metal is a good catalyst for reactions; in fact it is somewhat too good for most purposes, as finely divided silver tends to result in complete oxidation of organic substances to and water, and hence coarser-grained silver tends to be used instead. By far the most important oxidation state for silver in complexes is +1.

History of the medical use of silver
