

# Preliminary survey of Mycorrhiza on a derelict industrial site.

University of Salford - Planning Advice Note 33: Development of contaminated land

Description: -

-preliminary survey of Mycorrhiza on a derelict industrial site.

-preliminary survey of Mycorrhiza on a derelict industrial site.

Notes: MSc thesis, Biological Sciences.

## Michigan Industrial Growth and Development

Measure the depth from the top of casing to the bottom of the hole to the nearest 0. The route was proposed to go through an industrial estate, agricultural fields, pastures, grasslands, hedges and trees. AM fungi produce an insoluble glycoprotein, glomalin, which sequester trace elements and it should be considered for biostabilization leading to remediation of contaminated soils.

## Book on Biofertilizers Amp Vermiculture

The designer is referred to and for specific Existing Condition Plan requirements.

## Site Evaluation

A quantitative method for estimating the incidence of the endophytes was devised and differences between species, habitats and communities were found. Alternative pollutant-reducing practices may be proposed and will be reviewed on a case-by-case basis. The use of topsoil allows vegetation to become established faster and roots to penetrate deeper.

## Site Evaluation

Conclusions drawn from studies of metal uptake kinetics in solution cultures may not be valid for more complex field conditions and use of some combination of glasshouse and field experiments with organisms that occur within the same plant community is suggested.

## Mycorrhizae types and applications

Increases uptake of sulphur from the soil Increases the concentration of cytokinins and chloroplast in plants. Prior to considering the use of SMPs, the designer must develop a quantitative understanding of the remaining stormwater management needs with respect to each of the Post-Construction Stormwater Management Criteria: Water Quality, Channel Protection, and Flood Control. Additionally, the flow that is leaving the system must meet the requirements of the Stormwater Regulations.
