Small community water supply system very good one

The World Health Organization WHO has estimated that as many as 80 percent of all infectious diseases in the world are associated with insufficient and unsafe water.

Small Drinking Water Systems Research

It is higher in Romania 40% and Slovenia 50%. Asbestos has no carcinogenic effect when used to supply drinking water, but it is dangerous if inhaled. Rehabilitation should not simply be a matter of replacing defective equipment or repairing damaged infrastructure.

Small community water supply system very good one

As well as gaining ownership of the technical systems, they became responsible for water supply and sewage disposal in towns and rural areas. They can greatly help improve the health of underprivileged populations in rural and urban fringe areas. If pumping at the design rate causes drawdown in the well, a vent through a tapped opening should be provided.
