Christiane Maaß

Section 4 introduces our own analysis that is based on a standard Minimalist system involving the operation Agree that copies features from controllers onto targets and derives the different instantiations of agreement in DGS by means of differences in verb movement and featural content of functional heads. However, it is not the nature of the referent anaphoric vs.

Oxford Studies in Diachronic and Historical Linguistics

As a consequence, unification with DIR is ruled out. As for SLs, we are faced with the additional complexity that plain verbs may also co-occur with null arguments e.

Obviation in Romance : diachronic and synchronic perspectives

Should further research corroborate the existence of these additional patterns, they could be accommodated as follows under our analysis. Earlier versions of this research have been presented at FEAST 1 in Venice June 2011 , at DGfS 38 in Constance February 2016 , and at GLOW 40 in Leiden April 2017. Whatever the cause of the unacceptability of gapping with agreement verbs, this cannot easily be linked to the presence of an operator outside of VP and a variable on the verb.

Dalina Kallulli's talks and presentations

Despite the fact that the notion of canonicity has haunted the discussion for quite some time now, Costello was the first to thoroughly apply the 20 criteria proposed by Corbett to an SL, namely LSE see for a previous, yet less thorough, attempt.
