Perhaps this is because almost everything around us is created by engineers in one way or another, and there are always new, emerging and exciting technologies impacting… Not sure how best to study math? Got a question for us? This is called the partition operation. It significantly detracted from my learning of data structures in undergraduate CS.

In fact, unlike any of the other topics listed above, coding a red-black tree is beyond the scope of this book. Unfortunately, there is no magic bullet to make you a maths crack or pass your exam in no time. But the problem is the algorithm needs one whole pass without any swap to know that the list is sorted.

IF there were an equivalent text without this capricious installation cap I would drop this book in a heartbeat and replace it with one published in a manner the takes the reader's goals into account. It picks an element as pivot and partitions the given array around that picked pivot. The structure of each chapter is great, with learning content first, examples both code and explanation and then a small quiz at the end.
